List of Books on the Internal  
Secretions

ARMY MEDICAL LIBRARY

FOUNDED 1836

WASHINGTON, D.C.

To the Reader:

This is not a complete, finished book, but rather may be considered a final proof which is printed and arranged especially so that those to whom it is sent might extend to us the courtesy of correcting such parts as may be in error and make any additions that may be desirable.

Will you kindly give this early consideration, so that the revised edition may be forthcoming at an early date? A complete bound copy then will be sent to you with the editor's compliments.

## PREFACE

SINCE the founding of The Harrower Laboratory in 1918, I have been collecting all available information on the internal secretions. We maintain a Library and Translations Bureau where over two hundred English, French, German, Italian, Spanish and Portuguese journals are received. Articles of endocrine interest are clipped from these, filed and card-indexed, so as to be available for visiting physicians, or for those who may care to make inquiries by mail.

The important books on this subject are in our library and are also at the disposal of those who wish to consult them.

Such a large number of requests have come to us for lists of books published on this subject that we decided to issue this "List of Books on the Internal Secretions." While it is necessary to ask a nominal charge for it, nevertheless it is prepared solely for the convenience of physicians and we offer it to the profession hoping that it may be of considerable value.

It will be noticed that the books are listed according to the authors instead of by subject, and that they are divided first according to language, then subdivided according to countries. We have followed the style of the "Index Medicus" in punctuation, capitalization, and typographical arrangement.

Many books published in Great Britain are also published simultaneously by American houses. Where possible, the actual origin of the book is credited to the country in which it was written.

Prices, especially of continental books, are quite difficult to ascertain because of varying rates of exchange. We have, how-

ever, done the best we could to verify the current price of the books listed.

There is a large number of valuable small books, theses and pamphlets on the internal secretions that we wish might have been included in this list; but the line had to be drawn somewhere between pamphlets and books, and so we have arbitrarily excluded from this "List" all books and theses containing less than one hundred pages. It may be that in a later edition we shall include smaller publications—many of which are extremely valuable.

HENRY R. HARROWER.

March, 1923.

# A LIST OF BOOKS ON THE INTERNAL SECRETIONS

## ENGLISH BOOKS

### GREAT BRITAIN

- Bell (W. B.). The sex complex. London, 1916, Baillière, Tindall & Cox (New York: William Wood & Co.), 251 p.
- Berry (J.). Diseases of the thyroid gland. London, 1901.
- Biedl (A.). The internal secretory organs. London, 1912, John Bale, Sons & Danielsson, 586 p., 8°.
- Bramwell (B.). Anemia and some diseases of the blood-forming organs and ductless glands. Edinburgh, 1899.
- Cunningham (J. T.). Hormones and heredity. London, 1921, Constable & Co., 246 p.
- Craig (M.). Nerve exhaustion. London, 1922, J. A. Churchill, 148 p.
- Giles (A. E.). Sterility in women. London, 1919, Henry Frowde, 227 p.
- Mark (L. P.). Acromegaly: a personal experience. London, 1912, Baillière, Tindall & Cox, 168 p., 8°.
- McCarrison (R.). The etiology of endemic goitre. London, 1913, John Bale, Sons & Danielsson, 224 p., 8°.
- Murray (G. R.). Diseases of the thyroid gland. London, 1920, H. K. Lewis.
- Schäfer (Sir E. A.). The endocrine organs. London and New York, 1916, Longmans, Green & Co., 150 p., \$3.50.
- Vincent (S.). Internal secretions and the ductless glands. London, 1922, Longmans, Green & Co., 422 p., \$8.50.
- von Poehl (A.) & von Tarchanoff (J.). Rational organotherapy with reference to urosemiology. London, 1906, J. & A. Churchill, 250 p., 8°.

Williams (L.). Adenoids, nocturnal enuresis and the thyroid gland. London, 1909, John Bale, Sons & Danielsson, Ltd.

#### UNITED STATES
